

Joseph Mark Ochieng'

Cybersecurity Analyst | Threat Detection | Incident Response | Security Automation

Nairobi, Kenya · markjoejay1960@gmail.com · linkedin.com/in/joseph-mark-ochieng · github.com/joeabur

Summary

Cybersecurity Analyst with hands-on SOC experience across threat detection, alert triage, incident response, and vulnerability management in cloud and hybrid environments. Experienced in SIEM detection engineering, endpoint and edge monitoring with CrowdStrike Falcon and Cloudflare, and log correlation across AWS CloudTrail, CloudWatch, Kubernetes, and container workloads. Working knowledge of ISO 27001, NIST CSF, PCI DSS, and SOC 2.

Experience

SOC Analyst — Serianu Limited (assigned to Cashia, Kenya) · Aug 2025 – Present

- Monitor and investigate alerts across cloud, container, and SaaS environments using CrowdStrike Falcon and Cloudflare.
- Develop and tune FortiSIEM detection rules to reduce false positives and improve alert quality.
- Correlate AWS CloudTrail, CloudWatch, Kubernetes, and container events.
- Investigate incidents from triage through containment and post-incident review; maintain incident response playbooks.
- Define logging standards; monitor ingestion gaps, pipeline outages, and NTP drift.
- Support integration of Aikido SAST, dependency scanning, and secrets detection into CI/CD workflows.
- Track detection coverage, alert quality, false-positive rates, and response timelines.
- Produce weekly incident reports, executive summaries, and quarterly threat-trend analyses.
- Design and lead incident response tabletop exercises.
- Support vulnerability remediation tracking and identity and access reviews; collaborate with engineering and infrastructure teams.

Cyber Security Analyst & IT Support — Vintax Consultants, Kenya · Jan 2020 – Jul 2025 (part-time)

- Conducted vulnerability assessments and penetration testing using Metasploit, Burp Suite, and OWASP ZAP.
- Troubleshoot hardware, software, and network issues; supported backup and recovery processes.
- Delivered cybersecurity awareness training and technical guidance.
- Provisioned system access, onboarded users, and delivered Tier 1 IT support.

Skills

Security operations: SOC monitoring, alert triage, SIEM tuning, IOC analysis, event correlation, incident reporting. **Cloud/endpoint:** AWS CloudTrail, CloudWatch, CrowdStrike Falcon, Cloudflare, Kubernetes.

Vulnerability & testing: Nessus, OpenVAS, Metasploit, Burp Suite, OWASP ZAP. **DevSecOps:** Aikido Security, SAST, dependency scanning, secrets detection, CI/CD security gates. **Network:** Firewalls, IDS/IPS, VPNs, Wireshark, Nmap. **Compliance:** ISO 27001, NIST CSF, PCI DSS, SOC 2.

Certifications & Training

- Security Analyst — Cyber Shujaa, USIU-Africa (May–Aug 2023)
- Microsoft ADC Cybersecurity Skilling Program, Security Operations Analyst — USIU-Africa (May–Aug 2024)

Education

- B.Sc. Information Technology — KCA University (Sep 2019 – Nov 2023)
